

Premium Support Schedule

Coverage, response targets, escalation, and remedies

DOCUMENT ID	SS-PREMIUM-2026-10	VERSION	2026.10
EFFECTIVE DATE	October 1, 2026	EXECUTION DATE	Not separately executed

This Support Schedule describes Acme Cloud's standard Premium Support tier. It applies to subscriptions that select Premium Support in an executed Order Form.

SS-1 Coverage and support channels

Priority 1 incidents are covered 24 hours per day, seven days per week, including Acme Cloud holidays. Priority 2 through Priority 4 incidents are handled during business hours, defined as 8:00 a.m. to 6:00 p.m. in the customer's designated support region, Monday through Friday excluding Acme Cloud holidays.

Authorized customer contacts may submit incidents through the support web portal or by telephone. Telephone submission is available for Priority 1 and Priority 2 incidents.

SS-2 Severity definitions and initial-response targets

Priority	Definition	Initial-response target
Priority 1	Production service is unavailable or a critical business operation cannot proceed, with no reasonable workaround.	1 hour
Priority 2	A major function is materially impaired, but operations can continue with a workaround.	2 business hours
Priority 3	A non-critical function is impaired or assistance is required for a product issue.	1 business day
Priority 4	General guidance, documentation, or enhancement inquiry.	2 business days

An initial response acknowledges the incident, confirms the assigned priority, and begins investigation. It is not a resolution commitment. Targets begin when Acme Cloud receives sufficient information to investigate.

SS-3 Customer cooperation

The customer will provide reasonably requested logs, timestamps, configuration details, impact descriptions, and knowledgeable contacts. The customer will maintain current contact information and promptly test proposed workarounds when reasonably possible.

SS-4 Priority 1 escalation

Acme Cloud assigns an incident lead to an active Priority 1 incident. If material impact remains unresolved after the initial response, an authorized customer contact may request escalation to the support duty manager through the support portal or telephone channel.

The duty manager coordinates internal technical resources and communication cadence until impact is mitigated, the incident is reclassified by agreement, or a resolution plan is accepted.

SS-5 Service-credit eligibility

A failure to meet an applicable Priority 1 initial-response target may qualify for a service credit if the customer submits a request within 30 days after the affected incident closes. Acme Cloud will validate timestamps, severity, customer cooperation, and exclusions before determining eligibility.

An approved service credit is applied to a future invoice and is the customer's sole monetary remedy for failure to meet an initial-response target under this Schedule.

SS-6 Exclusions

Response targets do not apply to incidents caused by unsupported modifications, customer systems outside Acme Cloud's control, failure to follow published configuration requirements, force majeure events, or the customer's failure to provide reasonably requested diagnostic information.

SS-7 Order Form precedence

If an executed Order Form states a different initial-response target for a selected support tier, that specific target controls for the customer and subscription term identified in the Order Form. The remaining severity definitions, coverage provisions, channels, escalation process, exclusions, and service-credit rules in this Schedule continue to apply.
